Honeywell 6262, Air Cooled 20kW Home Standby Generator ...

Honeywell Home Standby Generators run on your home's existing natural gas or LP fuel supply. This allows for 24/7 backup and continuous running until power is restored. You can gain additional coverage by completing your generator system with a Honeywell Sync Transfer Switch. It easily manages two air conditioners right out of the box without adding additional components or cost, and can be expanded to manage additional large loads.

Generac Power Systems

An automatic standby generator is a back-up electrical system that operates whether you are home or away. Within seconds of an outage, it automatically supplies power directly to your home's electrical circuit breaker box. After utility power returns, the generator shuts itself off and waits for the next outage.
